APOLO

FREESTANDING INFRARED OUTDOOR HEATER

*A perfect combination
of lifestyle and comfort*

Dual-light 12W LED / 6400K / 2700K
cool white / warm yellow light.
Flexible neck in 3 positions.

The **APOLO** is a freestanding infrared outdoor heater with Dual Led Spot light, suitable for commercial use (hospitality, terraces, open spaces) and private use. Thanks to its nice finish and its pleasant adjustable dual lighting with both warm and cold light, it fits every environment.

A luxury model with adjustable Dual LED spot lighting

The elegant **Apollo** model provides **a perfect combination of lifestyle and comfort for both indoor and outdoor use**. Terrace, balcony, garage, event, cafe or restaurant: the Apollo provides a comfortable feeling and a pleasantly warm atmosphere. The slim, attractive metal housing (190 cm) is weather-resistant and durable. The patented carbon fiber heating elements generate a comfortable heat with low consumption costs in an environmentally friendly way. **Moreover, your garden or terrace is beautifully illuminated by the adjustable Dual LED lamp**. The motion detector and separately controlled heating elements in turn ensure a low consumption cost. This makes the Apollo one of the most efficient and environmentally friendly patio heaters in the world. *Extend your summer with this patio heater!*

Easy to use infrared heater

As a result of its 190 cm height and its 130° heating angle, Apollo can effectively heat rooms up to 20m². Unlike traditional heating, infrared rays do not heat the immediate environment, but they penetrate your body instead. This way the heat does not escape under the influence of the wind.

The Apollo freestanding heater is delivered ready for use. No additional assembly is needed. Thanks to its bottom wheels, you can also easily move the heater around. Furthermore, you can easily control the temperature using the remote control.

Focus on sustainability and innovation

The Apollo heater is an electric infrared heater for indoor and outdoor spaces. The heater is resistant to heavy rain, snow or splashes, and is therefore suitable for commercial use. Its patented carbon fibre heating tubes significantly reduce running costs by up to 90%, and realistically cuts carbon emissions by more than 95%, compared with gas patio heaters. It is also equipped with specialized lighting that can withstand high temperatures. This lighting is mounted on the top of the heater.

Apollo is also equipped with a passive infrared saving function (PIR) which automatically switches off the heating after 4 minutes without movement in the projection area.

APPLICATIONS	DIMENSIONS & POWER
Public Spaces • Terrace & Patio	190 x 50 cm • 24,3 kg 220-240 V • 50 Hz • 1480 & 2960 W

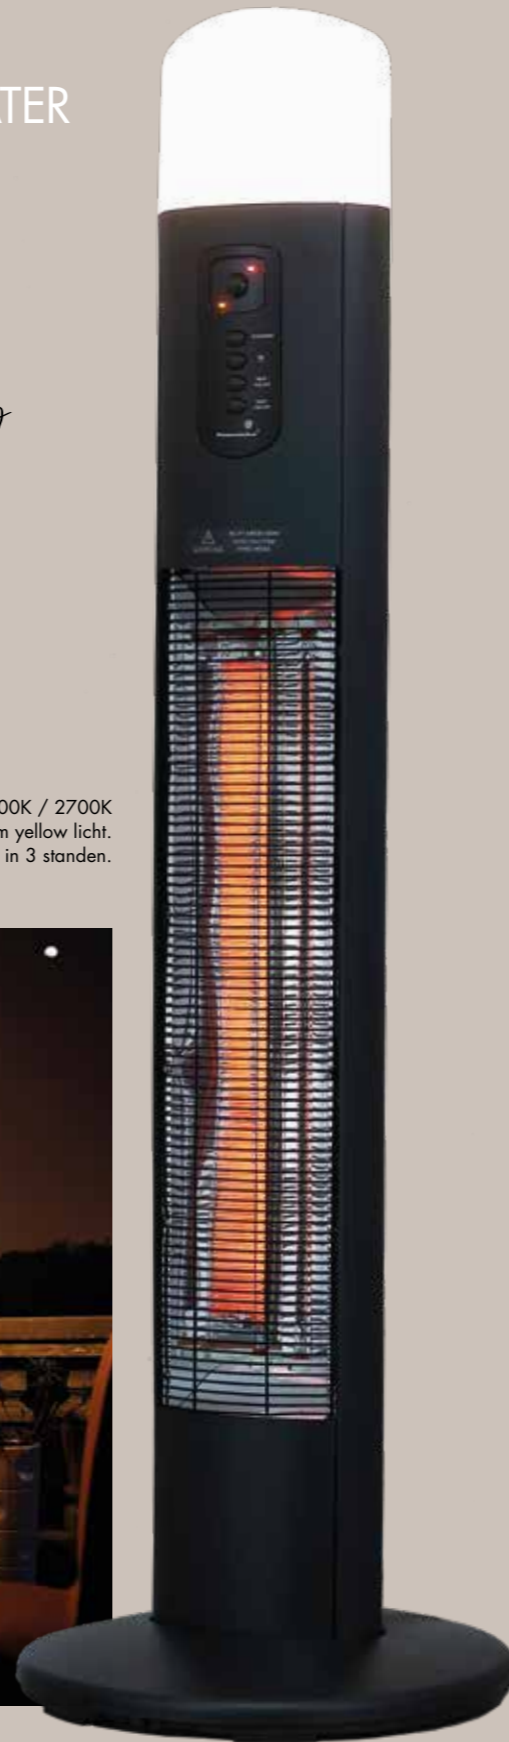

DIANA

FREESTANDING OUTDOOR INFRARED HEATER

BALI

FREESTANDING & FOLDABLE
INFRARED HEATER

*Perfect above a table
or seat usable*

The freestanding and foldable infrared heater **BALI** is extremely suitable for heating an open or semi-open spaces.

Veilig verwarmen met mobiele terrasverwarming

Our freestanding and foldable infrared heater Bali is a strong infrared heat emitter, which are extremely suitable for heating an open or semi-open spaces. In warehouses or workshops they can also offer the solution to local strong heat. Moreover, infrared heating is a very safe way of heating. The heating is done by radiation, which is awakened by electricity. So there is no flame, which greatly reduces the risk of fire.

Our electric mobile infrared heaters are designed with an eye for design. No cumbersome patio heater, but a stylish powerhouse. These infrared heaters not only radiate heat but are also class items on your patio.

The stunning contemporary slim line design and the foldable option makes the Bali heater ideal for indoor and outdoor spaces such as gardens, patios, balconies, smoking areas and garages. It's robust all metal design which is suitable for domestic and commercial use.

Functionaliteiten van de Bali terrasverwarming

De infrarood verwarmers is voorzien van carbonvezel verwarmings-elementen van **2000 Watt, die een levensduur hebben tot ongeveer 8000 branduren**. Dankzij de infrarood technologie worden de mensen verwarmd en niet de lucht.

De Bali heater is ontworpen met oog voor **design en klasse**. Dankzij zijn uitklapbare arm kan de heater zowel verticaal als horizontaal worden geplaatst. Je kunt hem boven een tafel of salon plaatsen zodat de mensen rond de tafel het warm hebben.

De Bali terrasverwarming kan zowel binnen als buiten gebruikt worden.

Tot slot is de inklapbare terrasverwarming in staat tot wel 15m² te verwarmen. En dat allemaal via een gewone aansluiting van 220 à 240 Volt. Door zijn gebruiksgemak en capaciteit is de Bali terrasverwarmer dus geschikt voor privégebruik én gebruik in de horeca.

ALFRESCO

INFRARED OUTDOOR HEATER

*Remarkably efficient
and cost effective*

Heating outdoor and cold areas has just become much simpler and effective as a result of a major breakthrough in heater technology, with the **ALFRESCO** infrared outdoor heaters.

Wall Mounted ALFRESCO infrared heaters

The **Alfresco** heaters do not waste energy warming the air but rather, allow specific spaces within an outdoor area to be targeted, warming only the people and objects in those spaces. Whether for work or recreation, the wall mounted heaters turn cold indoor and outdoor areas into comfortable inviting spaces.

These Alfresco infrared heaters produces safe infrared radiant energy that is only absorbed by solid objects and is not wasted heating the air. Electric Infrared Heat is remarkably efficient and cost effective. Over 90% of the input energy is converted directly to radiant heat. Alfresco wall mounted heaters focus that energy on customers rather than the open air, so that it is effective at large distances.

In addition, the heaters can be fitted with motion sensors without negatively impacting on element lifespan. This ensures the heaters only operate when customers are present, providing significant savings.

The Wall Mounted alfresco infrared heaters are constructed from Marine Grade stainless steel and special composite alloy, providing outstanding resistance against corrosion – an important feature for humid climates or coastal areas.

With a compact and elegant design, they can fit any decor, and with easy installation and minimum clearance, **can be mounted at lower heights, under canvas or timber eaves**. The casing itself does not get very hot so the heater may be recessed into ceilings safely.

APPLICATIONS	DIMENSIONS & POWER
Warehouse • Public Spaces • Terrace & Patio • Residential Use • Commercial Use	99 of 156 x 22 x 30 cm 2,5 - 8 kW
