

FABRISAN

CARPET DEODORANT & SANITISER

BENEFITS:

- Eliminates urine odours
- Multipurpose deodouriser
- Eliminates almost any odour
- Safe on all carpets and fabrics
- Effective in removing moulds and spores

FABRISAN is a specialised carpet sanitiser and deodouriser specifically designed for removing difficult odours from carpets and fabrics. FABRISAN is highly effective in neutralising and removing persistent urine odours. FABRISAN is also highly effective in treating and restoring flood and water damaged carpet.

FABRISAN has been tested and approved by one of the worlds leading carpet fibre manufacturers. FABRISAN is safe to use on all types of carpets and stain resistant coatings. FABRISAN conforms to the Australian Standard AS3733-1990 for carpet cleaning. FABRISAN is internationally patented.

HOW IT WORKS

FABRISAN is a unique blend of natural biocidally active oils and is completely biodegradable. It leaves behind a dry crystalline non-resoiling residue on all types of carpets and fabrics. The patented blend of natural oils in FABRISAN are slowly released in the carpet for up to a week after FABRISAN is applied to provide long lasting protection against mould and other fungal growth.

FABRISAN dries using technology that encapsulates the soils into the crystalline residue. These residues can then be safely vacuumed away and removed from the carpet. This encapsulation and safe removal prevents re-soiling and redeposition. Odour causing materials are permanently removed within the encapsulated soils.

DIRECTIONS FOR USE

Detecting & Treating Urine: 1. An ultraviolet (black light) is used at night to detect urine deposits in carpets and fabrics. Urine fluoresces under UV light and can therefore be detected by using a black light. It should be noted

Fabrisan - December 2007, 1

that many other things fluoresce under UV light, however, with a little experience and a 'good nose' urine deposits are readily detectable from other fluorescent materials. When the urine is detected the area is simply sprayed with Fabrisan to neutralise the odour problem.

Floor & Water Damage: 1. In cases of severe flooding dispose of damaged underlay if required.

2. Extract as much water as possible. Pre-spray the back of the carpet with dilute Bactex and leave for 15 minutes. Extract with warm water.

3. Spray diluted Fabrisan (1 part Fabrisan to 4 parts water) onto the back of the carpet. Raise the carpet and dry with a heater.

4. After relaying the carpet lightly pre-spray the carpet with dilute Fabrisan (1:5 with water) and work into the carpet with a carpet rake. Stale Odours: Dilute 1 part Fabrisan with 4 parts water. Apply a light spray to the top of the pile and work into the carpet using a carpet rake. If possible apply a light spray to the back of the carpet.

SAFETY DATA

For further information refer to the Material Safety Data Sheet (MSDS) located on the Whiteley Industrial web site: www.whiteley.com.au

HEALTH AND SAFETY STATEMENT

There is no way of predicting an individual's response to cleaning or disinfecting products. All cleaning and disinfecting products have potential to cause skin and other irritation in susceptible individuals. Direct physical contact with the skin should be avoided. If irritation does occur when using this product or any other cleaning/disinfecting solution then the individual should be removed from direct contact with the solution until a satisfactory safe working environment for that individual is determined.

ENVIRONMENTAL STATEMENT

Whiteley Industrial manufactures products that comply with Australian and International environmental policy. Whiteley Industrial aims to ensure that every product is 100% biodegradable, whilst achieving optimal performance and benefit to customers. All Whiteley Industrial products are supplied in 100% recyclable containers.

Whiteley Industrial and its staff are fully committed to ensuring that our Australian environment and those international environs in which our products are used are enhanced by the use of technology, and that these environments are preserved for the enjoyment of future generations.
