

Alkali Spill Response Kit

SKU: Alkali Spill Response Kit (ZTSSBNK)

Link: <https://www.spillstation.com.au/spill-kits-lab-med/alkali-spill-response-kit/>

Product Information

Absorbing Capacity: 5 Litres

This ZTSSBNK alkali spill neutralising kit is designed to deal with a wide variety of alkaline liquids by moving the pH towards neutral and converting the liquid spill into an easily managed solid.

Product Description

The super absorbent neutralising polymer contained in this kit changes colour to indicate it has come in contact with an alkaline substance. The secondary colour change indicates that the spilled substance has been neutralised and converted into a form that is solid enough to safely and easily collect for disposal. This spill kit comes complete with warning signs, instructions, disposal bags and basic personal protection equipment equipment but additional equipment such as organic vapour respirators can be included if required.
