

Cytotoxic Body Fluid Spill Kit

SKU: Cytotoxic Body Fluid Spill Kit (ZTSSCNK)

Link: <https://www.spillstation.com.au/spill-kits-lab-med/cytotoxic-body-fluid-spill-kit/>

Product Information

Absorbing Capacity: 1.5 Litre

This ZTSSCNK cytotoxic body fluid spill kit is designed to deal with spills of body fluid from patients undergoing cytotoxic drug chemotherapy in clinical environments with hard surfaces.

If required in carpeted areas, the ZTSSCBF (<https://www.spillstation.com.au/spill-kits-lab-med/cytotoxic-spill-kit/>) is a better option.

Product Description

The polymer impregnated absorbent pad can absorb up to 500ml of liquid and is placed over the pooled liquid to absorb the bulk of the spill. The absorbent polymer powder can be used on liquid residue and liquids outside of the reach of the polymer impregnated pad.

The conversion from a liquid hazard into an easily managed solidified gel takes under 5 minutes. This spill kit comes complete with warning signs, instructions, cytotoxic disposal bags and basic personal protection equipment but additional equipment such as organic vapour respirators can be included if required.

ZTSSCNK Contents

- Body Fluid Solidifying Polymer
- Polymer Impregnated Absorbent Pad
- MAX60 Absorbent Sheets
- Safety Glasses
