UNDER-COUNTER UNIT WITH NECESSARY
BASIC FUNCTIONS – FOR PROFESSIONALS

DISCHER COMPACT

The smart minimalist

Our COMPACT unit

is the perfect model for cleaning bedpans, stool buckets, urine bottles, kidney dishes and 2L measuring cups, compatible with side cabinets etc., very small installation dimensions, and therefore also suitable for rooms with minimum space requirements. The DISCHER COMPACT unit offers effective cleaning and disinfection results, is reliable, safe and easy to operate.

Combination for room equipment

Product advantages

- ▶ 3 selectable rinsing programmes with different 3 A0 values, user-defined
- ▶ Illuminated start button, provides visual information on whether the unit is in operation or unoccupied
 - ▶ One-button operating system
- ▶ 3 temperature sensors for detecting the operating temperature
 - ▶ Two-line LCD plain text display
 - ▶ Adjustable levelling feet
- ▶ Expandable functions: Data logger, rush-hour mode, leakage sensor

The COMPACT unit with the necessary basic functions and dimensions such as a rinsing machine: (H = 860 mm, W = 500 mm, D = 570 mm). The expandable modular system makes it possible to supplement the room configuration.

DISCHER data logger

Data logger for process documentation as part of the standard package, on request also with Ethernet connection (IP) for remote enquiry and fault analysis. The data logger logs all operating parameter sets and thus ensures maximum operating and device safety.
